MAPS (Multidisciplinary Association for Psychedelic Studies) is a membership-based organization working to assist researchers worldwide to design, fund, conduct, obtain governmental approval for, and report on psychedelic research in humans. Founded in 1986, **MAPS is an IRS approved 501 (c)(3) non-profit corporation funded by tax deductible donations.** MAPS is focused primarily on assisting scientists to conduct human studies to generate essential information about the risks and psychotherapeutic benefits of MDMA, other psychedelics, and marijuana, **with the goal of eventually gaining government approval for their medical uses.** Interested parties wishing to copy any portion of this publication are encouraged to do so and are kindly requested to credit MAPS and include our address. The *MAPS Bulletin* is produced by a small group of dedicated staff and volunteers. **Your participation,** financial or otherwise, **is welcome.**

Apology/Correction

Our apologies to Robert Venosa, whose portrait of Dr. Albert Hofmann on the inside front cover of the Winter 2006-07 issue suffered from some significant printing problems. The proper image, brighter and uncropped, has now been posted on the MAPS site at *maps.org/catalog* and the inside back cover of this issue. MAPS' proceeds from the sale of these signed, limited edition portraits will be restricted for MAPS-sponsored LSD psychotherapy research.

2 **Letter from MAPS President**
Rick Doblin, Ph.D.
